

## Familiarity Review Template

**Name:** Theodore Hancock

**Date:** 12/8

**Week:** 13

**Coding Topic:** JSON

**Description of Understanding:** “JSON (JavaScript Object Notation) is a lightweight, text-based, language-independent data exchange format that is easy for humans and machines to read and write. JSON can represent two structured types: objects and arrays. An object is an unordered collection of zero or more name/value pairs. An array is an ordered sequence of zero or more values. The values can be strings, numbers, booleans, null, and these two structured types.”

File	Git Link	What should I be looking for?	Sandbox or Your code?
Main.java Fruits.json	<a href="https://github.com/blakejth/CIT360/tree/master/Assignments/JSON">https://github.com/blakejth/CIT360/tree/master/Assignments/JSON</a>	Main.java and fruits.json	Most of this is my own. Pulls from a JSON file, Displays its contents and allows user to add a rating to the fruit.
