# Familiarity Review Template

**Name:** Theodore Hancock
**Date:** 11/15
**Week:** 9

**Coding Topic:** UseCaseDocuments

**Description of Understanding:** "Use cases are a popular technique for documenting and understanding system requirements. Use case diagrams graphically depict who will use the system and in what ways the user expects to interact with the system. Use cases are triggered when an actor initiates a use case to complete a business task. An actor is someone or something that fulfils the role of interacting with the system in a specific way."
